

Physiology

Unit-1 $\Rightarrow$ General physiology Basic Concept

- ① Short - Answer $\rightarrow$
- a) cell physiology
 - b) Body fluid compartment
 - c) cell Division
 - d) cell & its membrane
 - e) Movements or transport of substances
 - f) list the ~~types~~ types of tissue & explain the function of muscular tissue

Unit-2 $\Rightarrow$ Respiratory system

- ① Short - Answer $\rightarrow$
- a) physiology of Respiration
 - b) Functions of Respiration system
 - c) Controls of Respiration
 - d) Diff b/w internal & external Respiration
 - e) chemical regulation Respiration
 - f) pulmonary circulation

- ② very - short Answer $\rightarrow$
- a) Define vital capacity, give normal value
 - b) alveolar
 - c) parts of Respiration system
 - d) alveolar duct
 - e) pleura of the lung
 - f) chest cavity

Unit 3 = Digestive System

Essay → ① Functions of the organs of digestive tract
② Enumerate the digestion of food in the stomach
③ Digestion, absorption, and transport in digestive system

Short Answer → ① Composition and function of saliva

② Functions of stomach

③ Functions of the small intestine

④ Explain the function of large intestine

⑤ Functions of the liver

⑥ Composition & function of gastric juice

Very Short Answer → ① Functions of the pharynx

② Write 2 acts of gastrin

③ Functions of tongue

④ Functions of pharynx

Unit-4 ⇒ Circulatory & Lymphatic System

Essay → ① Functions of Heart & explain the cardiac cycle

Short Essay → ② Conduction system of the heart

② Define cardiac output. Explain factors regulating

③ Systemic and pulmonary circulation

④ Circulatory shock

Very Short Answer → ① Normal pulse rate? Mention 2 causes for increase in pulse rate.

② Draw the Normal ECG label its parts

③ Blood pressure control

④ Function of lymphatic system

⑤ Name the antibodies

Unit-5 ⇒ Blood

Essay → ① clotting mechanism

Short Essay → ② Function of blood

② Haemostasis

③ Describe the structure & functions of Neutrophils

④ Types & functions of white blood cells

⑤ Erythropoiesis

⑥ classify the blood group

⑦ Rh incompatibility

Very-short-Answer → a) clotting factors

b) platelets

c) physical characteristics & volume of blood

d) plasma

Unit-6 — Endocrine System

Essay → a) Name endocrine glands & location

Short-Answer → a) Functions of the Endocrine system

b) Hypothalamus

c) Pituitary gland

d) Thyroid gland

e) Pancreas

f) IZ hormone

Very-short-Answer → a) Hormones of the anterior pituitary and its function

b) Hormones of the posterior pituitary and its function

c) Pineal gland

d) Thyroid gland

e) Parathyroid glands

Unit-7 - Sensory organs

Short-Answer → a) physiology of vision

b) errors of refraction

c) physiology of hearing

d) skin & its functions

very-short-answer → a) Hypermetropia c) presbycusis

b) Parts of middle ear d) myopia

e) Astigmatism f) function of organ of corti

g) cataract

Unit-8 - Musculoskeletal system

Short - Answer → a) functions of bone

b) classification of joints

c) Functions of the muscular system

d) Explain the role of joints in skeletal movements

very-short-answer → a) Mechanism of muscle contraction

b) Define isotonic muscle contraction

c) Define osteoblast

d) Rickets

e) Define osteoporosis

Unit-9 - Renal system

Essay → a) Mention the regions of urinary system and explain the functions of kidney

Short-Answer → a) Nephrons

b) formation and composition of urine

c) Describe the mechanisms that control glomerular filtration rate

d) Describe the micturition reflex

e) Hormonal regulation of glomerular filtration rate (GFR)

f) mechanism of reabsorption & secretion at renal tubule

Unit-10 = Reproductive system

Essay — Menstrual cycle

Short-Essay — menstrual cycle

Very-short-Answer — a) Epididymis

b) Functions of the testes

c) Vas Deferens

d) what is the function of seminal vesicle

e) prostate gland

f) Bulbo-urethral glands or Cowper's gland

g) Scrotum h) Semen i) Uterus

k) Define infertility.

j) Function of ovary

Unit -11 => Nervous system

Essay → 1) Describe the function of cerebrum
2) Limbic system

Short Answer → 1) Cerebral cortex
2) Medulla oblongata function
3) peripheral nervous system
4) Autonomic Nervous system function (Ans)
5) Describe Neuroglia & its function
6) What is referred pain? explain the theories for the referred pain
7) properties and function of synapse
8) Neurons vs Neuroglia
9) Cerebral spinal fluid
10) Cranial Nerve
