MEDICAL NURSING

1. Introduction……27
2. Common sign and symptoms and its management……28
3. Nursing management of patient with respiratory problems……29
4. Nursing management of patient with cardiovascular and hematological disease……31
5. Nursing management of patient with disorders of digestive system……35
6. Nursing management of patient with disorders of Urinary system……38

Asterisks (*) denotes repetition.

7. Nursing management of patient with disorders of Nervous system…….40
8. Nursing management of patient with endocrine disorders……..42
9. Nursing management of patient with immunological disorders...44
10. Nursing management of patient with integumentary disorders And sexually transmitted diseases……..45
11. Nursing management of patient with communicable diseases……46
12. Nursing management of patient with medical emergencies…….48

SURGICAL NURSING

1. Surgery and surgical nursing……..51
2. Operation room techniques……52
3. Nursing management of patient undergoing gatro intestinal surgeries……54
4. Nursing management of patient undergoing renal and Genitourinary surgeries……57
5. Nursing management of patient undergoing thoracic and Vascular surgeries……59
6. Nursing management of patient with disorders of Musculoskeletal system……61
7. Nursing management of patient with miscellaneous Surgical conditions……..63
8. Nursing management of patient with disorders of ear, nose And throat……67
9. Nursing management of patient with disorders of eye……69

Asterisks (*) denotes repetition.

PHARMACOLGY

1. Introduction to pharmacology……..72
2. Chemotherapy……..73
3. Pharmacology of commonly use antiseptics, disinfectants And insecticides……76
4. Drugs acting on GI system……76
5. Drug used on respiratory system……..77
6. Drugs used on urinary system……78
7. Miscellaneous drugs……79
8. Drugs used on skin and mucous membrane……79
9. Drugs used on nervous system……80
10. Cardiovascular drugs……83
11. Drugs used for hormonal disorders/supplementation Contraception and medical termination of pregnancy……85
12. Introduction to drugs used in alternative system of Medicine……---
13. Calculations……87

COMMUNITY HEALTH NURSING

1. Introduction……90
2. Environmental health……..92
3. Primary health care……..94
4. Epidemiology……..95
5. Epidemiology and nursing management of common Communicable diseases……..97
6. Epidemiology and nursing management of Non-communicable diseases……99
7. Demography……101
8. Population control……..102

SOCIOLOGY

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 1

INTRODUCTION

Essays:

1. Define sociology. Explain the importance of sociology to the nursing profession.(3+7=10) **
2. Discuss the importance and application of sociology in nursing.(10)*

Short essay;

1. Briefly explain the importance of sociology in nursing (7)

Short notes;

1. Scope of sociology (5)******
2. Nature of sociology (5)
3. Importance of sociology (5)*
4. Application of sociology in nursing (5)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 2

INDIVIDUAL AND SOCIETY

Short note

1. Characteristics of society (5)**
2. Nature of society (5)
3. Individualization (5)
4. Differences between society and community.(5)*
5. Personal disorganization (5)*
6. Elements of community (5)
7. Types of community. (5)

Differentiate between:

1. society and community (3)***

List down

1. Elements of community (2)*

Asterisks (*) denotes repetition.

UNIT 3

CULTURE AND SOCIALIZATION

Essays:

1. List out the features of culture. Describe the relation between culture and health (3+7)
2. Define culture. Discuss the cultural influences in health and disease (10)***
3. Describe socialization. Explain the process of socialization (10)

Short Essays:

1. Characteristics and evolution of culture (7)

Short note:

1. Nature of culture (5)
2. Process of socialization (5)*
3. Culture influence of health and diseases (5)
4. Functions of culture (5)*
5. Agencies of socialization (5)****
6. Socialization (5)*
7. Culture and health (5)*
8. Culture and socialization (5)
9. Social factors influencing health. (5)

Asterisks (*) denotes repetition.

Differentiate between

1. Culture and socialization (3)
2. Diversity and uniformity in culture (3)
3. Westernization and sanskritization (3)
4. Fashion and culture (3)
5. Material and non-material culture (3)

List down

1. Cultural lag (2)*
2. Agencies of socialization (2)*
3. Types of culture (2)
4. Social welfare programmes in India (2)
5. Socialization (2)

Write Briefly on:

1. Acculturation.(4)
2. Cultural lag (4)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 4
SOCIAL GROUPS

Essays:

1. Mention the characteristics of primary group. Explain the importance of primary group to the individual and to the society(3+7)
2. Define social group. Describe briefly the various kinds of social groups (10)

Short Essays:

1. Unorganized groups. (7)

Short note

1. Nature of primary group (5)
2. Nature of crowd (5)
3. Classification of crowds (5)
4. Secondary group (5)*
5. Features of secondary groups (5)
6. importance of secondary group in society (5)
7. Primary group (5)
8. Characteristics of primary group (5)

Differentiate between

1. Crowd and audience (3)*
2. Minority and marginalized group (3)
3. In group and out group (3)
4. Primary group and secondary group (3)**

Asterisks (*) denotes repetition.

TCON ACADEMIC CLUB

List down

1. Types of crowd (2)
2. Examples of secondary group (2)
3. Types of audience (2)
4. Vulnerable groups (2)
5. Mob. (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 5

SOCIAL PROCESS

Essay

1. Define Social system and explain the elements of social system (10)*

Short notes

1. Advantages of competition (5)
2. Role - conflict and its health effect (5)
3. Social processes (5)
4. Types of social process (5)
5. Forms of accommodation (5)
6. Factors effecting assimilation process (5)
7. Positive functions of conflict (5)
8. Types of social system (5)
9. Elements of social system (5)
10. Advantages of competition (5)

Differentiate between

1. Co-operation and competition (3)***
2. Competition and conflict (3)
3. Role and status (3)*

List down

1. Types of social system (2)*
2. Types of conflict (2)***

Asterisks (*) denotes repetition.

TCON ACADEMIC CLUB

3. Classification of isolation (2)*
4. Types of cooperation (2)
5. Types of social process (2)
6. Types of status (2)*
7. Forms of accommodation. (2)

UNIT 6

SOCIETY AND POPULATION

Essay

1. Explain the population explosion in India (10)

Short notes

1. Malthusian theory of population (5)****
2. Causes of population explosion in India (5)
3. Population explosion (5)
4. Population explosion in India (5)
5. Remedial measures for population explosion (5)

Asterisks (*) denotes repetition.

UNIT 7

SOCIAL INSTITUTION

Essay

1. Define family. Mention the features and types of family. What is the relevance of family in health and illness (12)
2. Define family .explain the role of family in health and disease (10)
3. Define family. How family influences health and health practices (10)
4. Define family and explain the function of family (10)*
5. Discuss the advantages and disadvantages of joint family system (10)

Short notes

1. Family welfare programs (5)**
2. Features of modern family (5)
3. Changes and problems in modern family (5)**
4. Functions of family (5)
5. Health functions of family /family influence on health (5)*
6. Remedial measures for family disorganization (5)
7. Types of family (5)
8. Problems of marriage in India (5)
9. Joint family (5)
10. Dis advantages of joint family (5)

Differentiate Between:

1. Endogamous and exogamous marriage (3)*
2. Nuclear and joint family (3)*

Asterisks (*) denotes repetition.

List down

1. Blended family (2)
2. Types of family (2)***
3. Dowry prohibition act (2)
4. Forms of marriage (2)
5. Rules of marriage (2)
6. Marriage problems in India (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 8

SOCIAL STRATIFICATION

Essay

1. Discuss the Indian cast system –its origin and features (10)
2. Explain the major form of the social stratification found in the Indian society (10)

Short notes

1. Features of caste in India (5)*
2. Caste system in India (5)
3. Social mobility (5)**
4. Social stratification (5)
5. Social stratification and its impacts on health (5)
6. Racial classification (5)
7. Race as a biological concept. (5)*

Differentiate between

1. Caste and class (3)**
2. Role and status (3)
3. Competition and conflict (3)
4. Vertical mobility and horizontal mobility (3)

Asterisks (*) denotes repetition.

List down

1. Types of social mobility (2)*
2. Types of race (2)
3. Major races in India (2)
4. Major races found in the world (2)
5. Types of status (2)
6. Stratification of society on basis of class (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 9

COMMUNITIES IN INDIA

Essay

1. Describe the types of communities in India. explain the features of village community (3+7)
2. List out the features of urban community and describe the major urban problems (3+7)
3. Define urbanization. Describe the health problems faced by urban people (10)
4. What is urbanization? How urbanization related to health and health practices (10)
5. Distinguish between rural and urban community (10)

Short notes

1. Major urban problems in India (5)**
2. Community development project (5)
3. Features of urban community (5)
4. Health facilities and practices in rural areas (5)
5. Health hazards of urban community (5)
6. Rural health hazards (5)
7. Changes in Indian rural life (5)*
8. Elements of community (5)
9. Characteristics of rural community (5)*

Asterisks (*) denotes repetition.

Differentiate between

1. Urban community and rural community (3)**

List down

1. Community development projects (2)*
2. Rural reconstruction programs (2)
3. Housing programs in India (2)
4. Mention four health problems of rural society (2)
5. Elements of community (2)
6. Health problems of rural society (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 10

SOCIAL CHANGES

Essays:

1. Define social change and explain the factors (10)*
2. What is social change? Which are the major factors influencing social change (10)

Short note (5)

1. Theories of social changes (5)
2. Factors affecting social change (5)*
3. Nature of social change (5)
4. Explain cyclical and linear theory (5)

List down

1. Theories of social change (2)**
2. Social change (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 11

SOCIAL ORGANIZATION

Short notes

1. Personal disorganization (5)
2. Remedial measures for social disorganization (5)
3. Causes of disorganization (5)

List down

1. Types of social disorganization (4)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 12

SOCIAL CONTROL

Essay:

1. Explain the role of nurse in social control (10)

Short notes (5)

1. Forms of social control (5)**
2. Religion as a means of social control (5)
3. Informal social control measures (5)
4. Importance of social norms in social life. (5)

Differentiate Between

1. Formal and Informal social control (2)
2. Folkways and Mores (3)

List down

1. Types of social controls (2)***
2. Types of mores (2)*

Write briefly on;

1. Agencies of social control (4)

Asterisks (*) denotes repetition.

TCON ACADEMIC CLUB

UNIT 13

SOCIAL PROBLEMS

Essay

1. What are the major social problems and how we can tackle it? (10)
2. What are the social problems? Explain in detail about the role of nurse in the prevention and eradication of social problems (10)
3. Explain Social Problems in Relation to its Cause, Effect and Solution (10)

Short notes (5)

1. Problems of working women (5)
2. Problems of elderly (5)
3. Social welfare programs in India (5)
4. Social welfare programs (5)
5. Causes of prostitution (5)**
6. Rights of women (5)
7. Juvenile delinquency (5)
8. Health effects of alcoholism (5)
9. Types of child abuse (5)
10. Health effect of drug abuse (5)
11. Consequences of child labor (5)

List down

1. Health effect of child labor (2)
2. Types of poverty (2)***

Asterisks (*) denotes repetition.

3. Types of child abuse (2)****
4. Types of handicapped (2)
5. Substance abuse (2)*
6. Problems of substance abuse (2)
7. Problems of elderly (2)**
8. Types of unemployment (2)*
9. Social welfare programs in India (2)
10. Social problems in Indian society (2)
11. Causes of juvenile delinquency (2)
12. Causes of prostitution (2)**
13. . Housing programs in India (2)
14. Social pathology (2)
15. social legislations in India (2)
16. Social problems (4)
17. Rights of women and children (4)
18. Broken family (2)

TCON ACADEMIC CLUB

Write Briefly on

1. Child abuse (4)

Asterisks (*) denotes repetition.

MEDICAL NURSING

INCLUDING PATHOLOGY

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-1

INTRODUCTION

Short notes:

1. Stages of illness (5)
2. Concept of disease causation (5)
3. Factors causing diseases (5)
4. Steps in nursing process (5)

Answer briefly:

1. Concepts of disease causation (4)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 2

COMMON SIGNS AND SYMPTOMS

Short notes:

1. Respiratory acidosis (5)
2. Hyponatremia (5)
3. Fluid overload (5)
4. Hypokalaemia (5)
5. Metabolic acidosis (5)
6. Fluid and electrolyte imbalance.(5)

Nurses role:

1. Hyperkalaemia (3)

Give reason:

1. Edematous extremities should be elevated (4)
2. Premedication before painful procedures (4)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 3

RESPIRATORY SYSTEM

Essays:

1. Mrs. A, 35 years old lady is admitted with pneumonia. Classify the types of pneumonia with causes. Explain the pathophysiology of pneumonia. Discuss the management of Mrs. A including nursing management (4+4+7=15)
2. Define bronchial asthma. Explain the etiology and pathophysiology of bronchial asthma. Write a short note on incentive spirometry. Plan a discharge teaching plan for a patient with bronchial asthma (2+4+5+4=15)
3. Define bronchial asthma. Explain the pathophysiology of bronchial asthma. Describe the clinical manifestations of bronchial asthma. Prepare a discharge teaching plan for the patient with bronchial asthma (2+4+3+6=15)
4. Mr. Ranganath a chronic smoker aged 65 years admitted with breathlessness is diagnosed as a case of COPD. Define COPD and list the causes of COPD. Discuss the findings on respiratory assessment. Explain the nursing care of this patient using nursing process approach (1+3+4+7=15)
5. Mr. A, 55 years old chronic smoker is admitted with the diagnosis of chronic obstructive pulmonary disease (COPD). What are the diseases included in COPD and describe the diagnostic tests to confirm the diagnosis. Explain the pathophysiology. Prepare a nursing care plan for this patient with nursing assessment for three priority problems. (2+3+4+6=15)
6. Mrs. A, 55 years old man is admitted with breathlessness and diagnosed as a case of COPD. Define COPD. Enlist the causes of COPD. Describe the medical and nursing management of Mr A.(12)
7. Specify the diagnostic tests used for patients with respiratory problems. Explain any one in detail with regard to purpose, procedure and nurses role (3+12=15)

Asterisks (*) denotes repetition.

Short notes:

1. Assessment of respiratory system (5)
2. Management of pulmonary tuberculosis (5)
3. Pulmonary embolism (5)
4. Pulmonary TB (5)
5. Bronchoscopy (5)
6. Pulmonary Function Test (PFT) * (5)
7. Medical management of a patient with bronchial asthma (5)
8. Pulse oximetry (5)
9. Health education in bronchial asthma (5)
10. Pulmonary oedema (5)
11. Mantoux test (5)

Nurses role:

1. Incentivespirometry (3)
2. Chest physiotherapy (3)
3. Thoracocentesis (3)

Give reason:

1. Oxygen of 1-2 litres is administered for a client with COPD (2)
2. Food and fluids are withheld for 1-2 hours after a bronchoscopy (2)
3. Early morning sputum sample collection (4)
4. The sensor of the pulse oximeter is placed on the patients nail (2)

Answer briefly:

1. Mantoux Test (4)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-4

CARDIOVASCULAR AND HEMATOLOGICAL DISEASES

Essays:

1. Mr. T, a 52 years old company executive is brought to emergency department with acute onset of chest pain. Breathlessness and sweating. Answer the following:
    - Define myocardial infarction
    - List the differences between chest pain in angina pectoris and myocardial infarction
    - Describe the steps of cardiopulmonary resuscitation
    - Discuss the nursing management of Mr. T (2+2+4+4)
2. Mrs Thangam is admitted with the diagnosis of acute angina pectoris. Explain the pathophysiology of angina pectoris. Describe the different types of angina pectoris.
   Prepare a discharge teaching plan for this patient. (4+5+6=15)
3. Mr. A of 50 years old is admitted with congestive cardiac failure (CCF). Discuss the pathophysiology and clinical features of CCF. Prepare a nursing care plan for Mr. A based on nursing process approach (4+4+7=15)
4. Compare myocardial infarction and angina pectoris with regard to the following: (3+2+10=15)
    - Clinical manifestations
    - ECG changes
    - Management
5. Mr. L, a 65 years old man is admitted to the CCU with the diagnosis of left ventricular failure (LVF). State any two differences between left and right ventricular failure. Specify two drugs with their action and side effects commonly prescribed for patients with congestive cardiac failure. Plan nursing care for Mr. L based on three prioritized health problems (4+4+7=15)

Asterisks (*) denotes repetition.

6. Explain the clinical manifestations, complications and management of myocardial Infarction (12)
7. Mr. R, 54 years old company executive is admitted with the diagnosis of coronary artery disease. Define coronary artery disease and list the risk factors associated with the disease. Describe the pathophysiology and prepare a health education plan on prevention of coronary artery disease (2+3+4+6=15)
8. Laxman, 65 years old chronic smoker is admitted to the CCU with complaints of exertional dyspnea, swelling of the lower legs and severe dizziness. He is diagnosed as a case of right ventricular failure (RVF). Mention any two differences between left ventricular failure and right ventricular failure. Explain the pharmacologic management of congestive heart failure. Prepare a nursing care plan for Mr. Laxman based on three prioritized nursing problems. (2+6+7=15)

9. Mr. Rajkumar aged 45 years is admitted with severe chest pain and diagnosed as a case of acute myocardial infarction. Define myocardial infarction and list the risk factors. Describe the clinical manifestations of myocardial infarction. Explain the nursing assessment and nursing interventions for three important nursing diagnoses for this patient (2+4+3+615)
10. Patient A, an 8 years old boy came to the hospital with frequent episodes of low grade fever. On examination the child had slight lymphadenopathy and splenomegaly. On subsequent investigations the patient was diagnosed to have leukaemia. Discuss the following with regard to patient A: (6+6+3=15)
    - Management
    - Nurses role in bone marrow aspiration
    - Counselling family members

Short essays:

1. Classification of angina pectoris and medical management of angina (7)
2. Classify leukaemia and explain the clinical features of leukaemia (4+3=7)

Asterisks (*) denotes repetition.

Short notes:

1. Haemophilia (5)
2. Antihypertensive drugs (5)
3. Types of anaemia and its treatment (5)
4. Health teaching for iron deficiency anaemia (5)
5. Cardiac catheterization (5)
6. Normal ECG (electrocardiogram) (5)
7. Angina pectoris (5)
8. Iron-deficiency anaemia (5)
9. Cardio pulmonary resuscitation (5)
10. Disseminated intravascular coagulation (DIC) (5)
11. Cardiogenic shock (5)
12. Bone marrow aspiration (5)

Answer briefly:

1. Haemophilia (4)
2. Plasmapheresis (4)

Nurses role:

1. Cardiac catheterization (3)
2. During and after blood transfusion (3)
3. Cardio-pulmonary resuscitation (3)
4. Bone marrow biopsy (3)
5. Treadmill test (3)
6. Care of a patient with thrombocytopenia (3)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

Give reason:

1. Pulse rate should be checked before administering tab-digoxin (2)
2. Canned foods are avoided in patients with chronic heart failure (2)
3. Stool softeners used in patients with myocardial infarction (2)
4. Placing a nitro-glycerine tablet sublingually in a patient with angina pectoris (2)
5. Strict monitoring of prothrombin time is done in patients on anticoagulants (2)
6. Constipation is to be avoided in a patient with an acute attack of myocardial infarction (2)
7. Salt restricted diet is given to cardiac patients (2)
8. CPR should be started within the first 3 minutes of cardiac arrest (2)
9. Client on anti-hypertensive drugs should be cautious while moving out of bed on awakening (2)
10. Sorbitrate tablets for a patient with acute angina pain is to be administered sublingually (2)
11. Reverse isolation is practised while caring for patients with leukaemia (2)
12. After cardiac catheterization, the limb used for cannulation is immobilized (2)
13. Sodium restricted diet in hypertension (2)
14. Haemarthrosis is often seen in patients with haemophilia (2)

Asterisks (*) denotes repetition.

UNIT-5

DIGESTIVE SYSTEM

Essays:

1. Mr. X, a 55 years old man admits to the medical unit with pedal oedema, ascites, jaundice and history of chronic alcoholism. Discuss the condition of Mr X with regard to the following:
    - Probable diagnosis of Mr X
    - Nurses role in liver biopsy
    - Portal hypertension and oesophageal varices

    (1+4+5+5=15)
2. Mrs. S a 35 years old house wife is admitted with irritable bowel syndrome. Answer the following:
    - Define irritable bowel syndrome
    - List the causes
    - Enumerate the relevant health education
    - Describe the medical and nursing management of Mrs. S

    (2+2+2+2+4=12)
3. Mr. M, 54 years old diagnosed as hepatic coma is admitted in ward. Answer the following: (3+3+6=15)
    - Enumerate pathophysiological changes in hepatic coma
    - Enlist the clinical features of hepatic coma
    - Write medical and nursing management of Mr. M with hepatic coma
4. Mr Suresh, a chronic alcoholic is admitted to the ICU with haemetemesis and fall in blood pressure. Define cirrhosis of liver and explain the complications of cirrhosis of liver. Describe the immediate management of Mr Suresh (2+5+8=15)
5. Mr. A, 62 years is admitted with hepatic coma: Define hepatic coma and enumerate its etiology. Explain the medical management of hepatic coma and describe the nursing management of Mr. A. (2+3+4+6=15)

Asterisks (*) denotes repetition.

6. Mr. X is admitted as a case of hepatic encephalopathy. Define hepatic encephalopathy and explain its pathophysiology in brief. Discuss the medical management. Prepare a nursing care plan for four priority nursing problems (1+3+4+7=15)

Short essays;

1. Mr. R is admitted in a hospital and is diagnosed as cirrhosis of liver. Define cirrhosis of liver. Briefly explain the complications and medical management of cirrhosis of liver. (7)

Short notes:

1. Complications of cirrhosis of liver (5)
2. Clinical features of cirrhosis of liver (5)
3. Portal hypertension (5)
4. Obesity (5)

Nurses role:

1. Liver biopsy * (3)
2. Preparation of patient for colonoscopy (3)

Answer briefly:

1. Esophageal varices (4)

Give reason:

1. Handwriting chart is monitored for a patient with hepatic failure (2)
2. Full bladder for ultra sound abdomen (2)
3. Patients are instructed to take plenty of oral fluids after barium meal studies (4)
4. A laxative and cleansing enema is prescribed a day before the barium enema (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

5. When abdominal paracentesis is done, the nurse must have the patient void immediately before the procedure. (2)
6. Urine output is closely monitored in a patient with acute gastroenteritis (2)
7. Patients should be on NPO status before gastroscopy (2)
8. Oral feed is contraindicated immediately after upper gastrointestinal endoscopy (2)
9. Bowel wash is given for patients with hepatic encephalopathy (2)
10. Urinary bladder is emptied just before abdominal paracentesis. (4)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-6

URINARY SYSTEM

Essays:

1. Mr. Ravi, 55 years is admitted with the diagnosis of acute renal failure. Explain the causes of acute renal failure. Prepare a nursing care plan for this patient according to nursing process based on three prioritized nursing problems (7+8=15)
2. Define nephrotic syndrome. Discuss the clinical features. Explain the medical management. What health teaching will you give the patient. (2+5+5+3=15)
3. Ms.Suma, a 16 years old girl is admitted with the diagnosis of acute renal failure. List the etiological factors of acute renal failure. Explain the pathophysiology of acute renal failure. Explain the nursing management of Ms.Suma (3+5+7=15)
4. Mrs. Nagamma is admitted to the nephrology ward with chronic kidney disease. Define chronic kidney disease and enumerate its causes. Prepare a diet plan for Nagamma. Discuss the nursing care for her using nursing process approach (1+3+4+7=15)

Short notes:

1. Nephrotic syndrome** (5)
2. Cystourethrogram (5)
3. Management of chronic renal failure (5)
4. Causes of acute renal failure (5)
5. Intravenous pyelogram (5)

Asterisks (*) denotes repetition.

Answer briefly:

1. Causes of Acute Renal Failure (4)
2. Pathophysiological changes in glomerulonephritis (4)

Nurses role:

1. Renal biopsy * (3)
2. Collection of 24 hour urine specimen (3)
3. Intravenous pyelogram (3)
4. Care of patient after renal biopsy (3)
5. Intravenous pyelography (IVP) (3)
6. Cystoscopy (3)

Give reason:

1. Liberal intake of fluids is encouraged for a patient after cystoscopy. (2)
2. Intake output chart should be maintained for a client on diuretics (2)
3. Erythropoietin is given in chronic renal failure (2)
4. Hypocalcaemia occurs in chronic renal failure (4)
5. Fruits and fruit juices are restricted in patients with chronic renal failure (2)
6. High protein diet is encouraged for a child with nephrotic syndrome (2)
7. Serial urine samples of the patient are collected for observation after renal biopsy (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-7

NERVOUS SYSTEM

Essays:

1. Define cerebrovascular accident (CVA). Discuss the types, clinical features and medical management in CVA. Prepare a nursing care plan for a patient with CVA (2+6+4=15)
2. Define transient ischemic attack (TIA). Compare the clinical features of patients with right and left sided hemiplegia. Elaborate the nursing management of a patient with left sided hemiplegia (1+5+9=15)

Short essays:

1. Classification of angina pectoris and medical management of angina (3+4=7)
2. Clinical manifestations of increased intracranial pressure (7)

Short notes:

1. Guillian Barre syndrome * (5)
2. Clinical features and drugs used in parkinsonism (5)
3. Clinical features of cerebrovascular accident (5)
4. Bell's palsy (5)
5. Meningitis (5)
6. Medical management of Parkinson disease (5)
7. Lumbar Puncture * (5)
8. Addison's disease (5)
9. Parkinson's disease* (5)
10. CSF analysis (5)
11. Migraine (5)
12. Glasgow coma scale (5)

Asterisks (*) denotes repetition.

Nurses role:

1. .Electroencephalogram(EEG) * (3)
2. Care of a patient after lumbar puncture (3)
3. Lumbar puncture (3)

Give reason:

1. Hair wash before electro encephalogram (4)
2. C-shaped position should be maintained for a patient undergoing lumbar puncture (2)
3. Placing an eye-patch on an unconscious client is essential. (2)
4. Patient with meningitis is preferably nursed in a room with dim lights (2)
5. Patient after lumbar puncture is nursed flat in bed (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-8

ENDOCRINE DISORDERS

Essays:

1. Mr. P, 60 years old is a known case of diabetes mellitus on insulin. What are the signs and symptoms of diabetes mellitus. Discuss the different types of insulin. What are the complications you can expect in Mr. P and how will you prevent them. (5+5+5=15)
2. Mrs. S is admitted to your ward with type II diabetes mellitus. Differentiate between type I and type II diabetes. Enlist the risk factors of type II diabetes mellitus and add a note on oral hypoglycemic drugs. Explain the acute complications of diabetes mellitus (3+3+4+5=15)

Short essays:

1. Discuss the cause, clinical features and management of patients with Addison's Disease (4+3=7)

Short notes:

1. Glucose tolerance test (5)
2. Hypothyroidism (5)
3. Addison's disease (5)
4. Diabetic ketoacidosis (5)
5. Causes of acute renal failure (5)
6. Thyroid storm (5)
7. Thyroid crisis (5)
8. Acute complications of diabetes mellitus (5)
9. Complications of type II diabetes mellitus (5)

Asterisks (*) denotes repetition.

Nurses role:

1. Prevention of diabetic complications (3)
2. Insulin therapy (3)
3. Oral glucose tolerance test(OGTT) (3)
4. Fine needle aspiration cytology (FNAC) (3)

Give reason:

1. Serum Insulin is not administered orally (2)
2. Diabetic patients are advised to wear properly fitting foot wears (2)
3. Ensuring that food is available before administering insulin (2)
4. Diabetic patients are advised to wear well fitting footwear (2)
5. Injection sites to be rotated while administering injection insulin (2)
6. Patients on steroid therapy should avoid skipping the dose without doctors order (2)
7. A patient with Graves disease is administered propranolol (Inderal) (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-9

IMMUNOLOGICAL DISORDERS

Essays:

1. A 24 years old lady is admitted to your ward with HIV infection and fever. Differentiate between HIV infection and AIDS. Explain the modes of transmission of HIV infection. Explain the medical management of HIV infection and describe the nursing management of this patient. (2+3+4+6=15)

Short essays:

1. Describe the pathophysiology, clinical manifestations and medical management of AIDS. (7)

Short notes:

1. Management of patients with AIDS (5)
2. Acquired immunodeficiency syndrome (5)
3. Graft versus host disease (5)
4. Counselling of an HIV (Human immune deficiency virus) infected patient (5)

Answer briefly:

1. National AIDS Control Programme (4)
2. Gout (4)

Nurses role:

1. A patient receiving anti-retroviral therapy (ART) (3)

Asterisks (*) denotes repetition.

Give reason:

1. Protein restricted diet is advised for patients with gout (4)
2. Anti-Retroviral Therapy (ART) once started should never be stopped (2)

UNIT-10

INTEGUMENTARY AND STDs

Short notes:

1. Acne vulgaris (5)
2. Psoriasis (5)
3. ELISA test (5)
4. Pemphigus (5)
5. Gonorrhoea (5)
6. Sexually transmitted diseases and its prevention (5)

Answer briefly:

1. Pemphigus * (4)
2. Eczema (4)

Asterisks (*) denotes repetition.

UNIT-11

COMMUNICABLE DISEASES

Essays:

1. Discuss the following conditions in terms of etiology, pathophysiology, clinical features and management. (7.5+7.5=15)
    - Malaria
    - Hepatitis A

Short essays:

1. Diagnosis and management of dengue fever (7)

Short notes:

1. Cholera (5)
2. Aetiology, clinical features and management of hepatitis B (5)
3. Dengue fever * (5)
4. Typhoid (5)
5. Tetanus (5)
6. Health education to a patient with hepatitis- B (5)
7. Leptospirosis (5)
8. Herpes (5)

Answer briefly:

1. Infection (4)
2. Chicken pox (4)
3. Isolation precautions (4)
4. Prevention and control of typhoid fever (4)

Asterisks (*) denotes repetition.

TCON ACADEMIC CLUB

5. Rabies (4)
6. Tetany (5)

Nurses role:

1. Infection control (3)
2. Barrier nursing (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-12

MEDICAL EMERGENCIES

Essays:

1. Mr. T, 60 years old agricultural worker is admitted with a history of snake bite: List the four major poisonous snakes in India. What are the signs and symptoms seen in case of neurotoxic envenomation. Describe the first aid measures after a snake bite. Describe the medical treatment for this patient with neurotoxic symptoms (2+4+4+5=15)

Short essays:

1. Discuss the haematological and neurological manifestations in snake bite (7)
2. Emergency management of snake bite (7)

Short notes:

1. Snake bite (5)
2. Management of organophosphorous poisoning (5)
3. Hypovolemic shock (5)

Answer briefly:

1. Nursing management of a patient with snake bite (4)
2. Allergies (4)

Nurses role:

1. Prevention of hypovolemic shock (3)
2. Hypersensitivity reactions (3)

Asterisks (*) denotes repetition.

Give reason:

1. Bleeding time and clotting time should be monitored in a patient admitted with snake bite. (2)
2. The site of snake bite should not be elevated above the heart level (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

SURGICAL NURSING

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-1

SURGERY AND SURGICAL NURSING

Short notes:

1. Pre-operative patient education ** (5)
2. Inflammation (5)
3. Wound healing process (5)
4. Preoperative teaching(5)
5. Inflammatory response (5)
6. Stages of wound healing****(5)

List down:

1. Four purposes of preoperative medications (3)
2. Methods of dressing* (3)
3. Complications of wound healing (3)
4. Three types of shock (3)
5. Three common postoperative complications (3)

Differentiate between:

1. Hypovolemic and anaphylactic shock (4)
2. Neurogenic shock and haemorrhagic shock (2)
3. Inflammation and infection (2)

Asterisks (*) denotes repetition.

UNIT-2

OPERATING ROOM TECHNIQUE

Short notes:

1. Standard precautions (5)
2. Stages of anaesthesia*****(5)
3. Types of suture materials *** (5)
4. Complications of general anesthesia in the immediate post-operative period (5)
5. Complications of anaesthesia(5)
6. Standard precautions in operation theatre (5)
7. Responsibilities of nurse in operation theatre (5)
8. Prevention of accidents in operation theatre (5)
9. Principles of operation theatre technique*** (5)
10. Biomedical waste management in operating room (5)
11. Infection control in operation theatre (5)

List down:

1. Three principles of operation theatre technique (3)
2. Stages of general anaesthesia * (3)
3. Types of anaesthesia(3)
4. Classification of anesthesia (3)
5. Types of suture materials**** (3)
6. Types of sutures (3)
7. Complications of General Anaesthesia* (4)
8. Complications of spinal anaesthesia (3)

Asterisks (*) denotes repetition.

9. Two classifications of anaesthesia (3)
10. Principles of operation theatre technique (3)
11. Three types of anaesthesia (3)

Differentiate between:

1. Fumigation and disinfection (2)
2. Medical asepsis and surgical asepsis (2)
3. Disinfection and sterilization***** (4)
4. Paralysis and paresis*** (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-3

NURSING MANAGEMENT OF PATIENTS UNDERGOING GASTROINTESTINAL SURGERIES

Essays:

1. Discuss the etiology and pathophysiology of ulcerative colitis. Explain the surgical procedures used to treat ulcerative colitis and draw a preoperative nursing care plan based on nursing process for a patient with ulcerative colitis (2+2+5+6=15)
2. Define peptic ulcer. Discuss the etiology and the pathophysiology of peptic ulcer. Explain the surgical therapy and the preoperative management of a patient suffering from peptic ulcer.(1+2+3+3+6)
3. Define colostomy. Classify types of colostomy. Explain post-operative care of the stoma. (2+4+4=10)
4. Define peptic ulcer. Discuss the clinical manifestations and complications of chronic peptic ulcer.Draw a nursing care plan for a patient who has undergone partial gastrectomy for the first 24 hours. (1+4+4+6=15)
5. Mrs. Rema 48 years old is admitted in the ward with diagnosis of intestinal obstruction.

Answer the following:

1. List down the causes. Enumerate the signs and symptoms. Plan the post operative nursing care on priority basis of the first 48 hours(3+4+8=15)

Asterisks (*) denotes repetition.

Short essays:

1. Mr. Rajan is admitted to post-operative unit following gastrectomy for cancer of stomach. What are the risk factors of cancer of stomach. Briefly explain the complications and its management following gastrectomy. (3+4=7)
2. Discuss the pathophysiology of acute pancreatitis. Explain the conservative therapy used in acute pancreatitis (3+4=7)

Short notes:

1. Care of patient with an ileostomy (5)
2. Causes of carcinoma stomach (5)
3. Inflammatory bowel disease (5)
4. Hiatus hernia (5)
5. Care of patient with a colostomy (5)
6. Nursing care following hemorrhoidectomy (5)
7. Types of colostomy (5)
8. Esophageal varices (5)
9. Haemorrhoids (5)
10. Health education to patients with permanent colostomy (5)
11. Dumping syndrome***(5)

List down:

1. Three indications for colostomy (3)
2. Three complications of gastrectomy (3)
3. The causes of intestinal obstruction *(3)
4. Three types of hernias (3)
5. Types of hernia*[10] (3)
6. Types of colostomy (3)

Asterisks (*) denotes repetition.

Differentiate between:

1. Barium meal and barium enema*(3)
2. Billroth I and Billroth II procedure (3)
3. Hyponatremia and hypernatremia (2)
4. Anal Fissure and Anal Fistula (4)
5. Fissure and fistula***** (2)
6. Colitis and Ileitis (4)
7. Incisional hernia and inguinal hernia (2)
8. Cushing's ulcer and curling's ulcer (2)
9. Colostomy and colectomy (2)
10. Herniorrhaphy and hernioplasty (2)
11. Gastric ulcer and duodenal ulcer ** (2)
12. Hemoptysis and hematemesis ** (2)
13. Cholelithiasis and cholecystitis (5)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-4

NURSING MANAGEMENT OF PATIENTS UNDERGOING RENAL AND GENITOURINARY SURGERIES

Essays:

1. Mr. Kumar aged 68 yrs admitted with complaints of burning micturition and increased frequency of urination. Define benign prostatic hyperplasia (BPH). List down the clinical manifestations. Explain the specific post-operative nursing management of this patient(2+5+8=15)
2. Define renal calculi. Enumerate the types of renal calculi. Explain the post-operative management of patient with renal calculi (2+3+5)
3. What are the clinical manifestations of benign prostatic hypertrophy (BPH). Describe the diagnostic measures of benign prostatic hypertrophy. Explain the management modalities of benign prostatic hypertrophy (3+3+6)
4. 55 years old Mr. A was admitted in the ward with complaints of pain in the flank region. He was diagnosed to have renal calculi. Enumerate the causes of renal calculi. Describe the differences in pain between renal, uretic and bladder calculi. Applying nursing process, explain pre and post-operative nursing care of patient undergoing percutaneous nephrolithotomy (PCNL)(3+3+6)
5. Mrs. Jennifer aged 40 years with recurrent pyelonephirtis is diagnosed to have urinary stones. Define and classify urinary calculi. Discuss the treatment option and health education for this patient(2+5+8=15)
6. Define the term urolithiasis. Enumerate the types and explain the various methods in management of patient with urolithiasis(1+4+5=10)

Asterisks (*) denotes repetition.

Short notes:

1. Methods of urinary diversion* (5)
2. Continuous bladder irrigation (5)
3. Hydrocele (5)
4. Clinical manifestation in renal cell carcinoma (5)
5. Lithotripsy technique(5)

List down:

1. Surgical approaches in benign prostatic hypertrophy * (3)
2. Types of urinary calculi (4)
3. Four methods of urinary diversion (3)
4. Types of renal calculi* (3)

Differentiate between:

1. Lithotomy and lithotripsy (2)
2. Haematuria and oliguria (2)
3. .Epispadias and hypospadias*[11] (2)
4. Colloids and crystalloids (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-5

NURSING MANAGEMENT OF PATIENTS UNDERGOING THORACIC AND VASCULAR SURGERIES

Essays:

1. Define Raynaud's disease. List the clinical features of acute ischemia. Explain nursing care after lumbar sympathectomy (2+4+4=10)
2. Define thromboangitisobliterans. List down the specific symptoms. Explain the post – operative nursing care after lumbar sympathectomy. (2+4+4)
3. Define thromboangitisobliterans. List the clinical features of acute ischaemia. Explain the nursing care after lumbar sympathectomy. (2+4+4=10)

Short essays:

1. Discuss the clinical manifestations and management of a patient with chest injury (2+5=7)
2. Nursing care of patients with Chest drainage (2+2+3=7)

Short notes:

1. Lung abscess*** (5)
2. Pneumothorax (5)
3. Varicose veins (5)
4. Hyperbaric oxygen therapy (5)

Asterisks (*) denotes repetition.

5. Care of patient with chest drainage (5)
6. Care after pneumonectomy** (5)
7. Management of inter costal drainage (5)
8. Care of patient with intercostals drainage****** (5)
9. Management of a drain (5)

List down:

1. The benefits of deep breathing and coughing exercise (3)
2. Types of aneurysms***(4)
3. Signs of acute ischaemia (3)
4. Types of chest injuries (3)
5. Three characteristic features of chronic bronchitis (3)
6. Principles in the functioning of inter costal drainage. (3)
7. Types of pneumothorax. (4)

Differentiate between:

1. Bronchoscopy and bronchogram (2)
2. Segmental resection and pneumonectomy*** (2)
3. Haemothorax and pneumothorax*** (2)
4. Tachycardia and bradycardia (2)
5. Bradypnea and tachypnea **(2)
6. Empyema and emphysema****** (2)
7. Ischemia and infarction***(2)

Asterisks (*) denotes repetition.

UNIT-6

NURSING MANAGEMENT OF PATIENTS WITH DISORDERS OF MUSCULOSKELETAL SYSTEM

Essays:

1. Define amputation. List the complications following amputation. Explain the post- operative management of below knee amputation. (2+4+4=10)
2. 2. Define amputation. List the complications following amputation. Explain the rehabilitative measures for this patient. (1+4+5=10)

Short essay

1. Define amputation. Enlist the complications of amputation. Explain the postoperative management of a patient after below knee amputation. (7)

Short notes:

1. Types of head injury (5)
2. Types of splints and their indications in fracture (5)
3. Colles' fracture (5)
4. Stages in fracture healing (5)
5. Care of patient on skin traction*** (5)
6. Care of patient with plaster cast (5)
7. Nursing care of a patient with plaster cast (5)
8. Stages of bone healing (5)

Asterisks (*) denotes repetition.

List down:

1. Three types of fractures (3)
2. Complications of fracture ***(4)
3. Clinical features of osteoarthritis***(3)
4. Types of fractures (3)
5. Drugs used in rheumatoid arthritis (4)
6. Clinical features of rheumatoid arthritis* (3)
7. Stages of bone healing (3)

Differentiate between:

1. Osteoarthritis and rheumatoid arthritis****** (2)
2. Acceleration and deceleration injuries (2)
3. Subluxation and dislocation (4)
4. Medical asepsis and surgical asepsis (2)
5. Arthodesis and arthroplasty (2)
6. Skin traction and skeletal traction **(2)
7. Amputation and disarticulation (2)
8. Osteomalacia and osteomyelitis ***(2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-7

NURSING MANAGEMENT OF PATIENTS WITH MISCELLANEOUS SURGICAL CONDITIONS

Essays:

1. Mrs. Shashi is diagnosed to have breast cancer. Discuss the following: Risk factors of breast cancer. Types of breast cancer. Surgical management of breast cancer (2+2+6=10)
2. Mrs. Sarah aged 60 yrs is admitted with complaints of lump in her breast. Define Breast cancer. List down the surgical approaches. Explain specific post – operative nursing management. (3+4+8=15)
3. Explain the etiology, clinical manifestations and surgical approaches in a patient with carcinoma breast. Explain the post-operative management of patient who has undergone mastectomy. (3+2+3+7=15)
4. Mr. Mark, 60 years old is admitted with the history of severe headache, vomiting, confusion and double vision. What are the causes and risk factors for increased ICP and explain the nursing management for increased ICP. (5+5=10)
5. Mrs. Raji, 45 years old had undergone modified radical mastectomy for cancer of breast. List postoperative exercises following mastectomy. Describe the nursing management of Mrs. Raji for the 1st 48 hours of surgery. Explain breast selfexamination (3+6+3=12)
6. Explain the types of burn injury. Classify the burn injury depth. Discuss the emergency management of thermal burns. (2+2+6=10)
7. Discuss the sources and classification of burn injury. Explain the nursing management of a patient with 70% burns during emergent phase. (2+3+7=12)

Asterisks (*) denotes repetition.

8. Mr. Arun, 45 yrs old is admitted with injury to the head after a road traffic accident. Define head injury. Discuss the specific assessment to be done for the patient. Explain the post operation nursing management after craniotomy (3+4+8=15)
9. Mrs. Deepa, 25 yrs old is admitted with head injury after a road traffic accident. Define head injury. Discuss specific observations to be made for this patient. Explain post-operative nursing management after craniotomy. (3+4+8=15)
10. Mr. Ravi, a 50 years old man is admitted with head injury after a road traffic accident. Definehead injury, Discuss the assessment of this patient. Prepare a nursing care plan for thepatient after craniotomy. (2+5+8=15)
11. Mrs.Lakshmi, aged 45 years, mother of three children has come with a lump in her breast. Define breast cancer. List down the diagnostic measures to confirm breast cancer. Explain the pre and post operative nursing management of this patient. (2+5+8=15)
12. Mr Krishnan, 47 years old man is admitted to the casualty with 60% TBSA burns. Explainthe initial assessment and fluid resuscitation of Mr Krishnan. Draw a nursing care planbased on nursing process for the first 48 – 72 hours. (3+4+8=15)
13. Mrs. Geetha 52 years old is admitted with diagnosis of carcinoma breast. Enumerate the risk factors of carcinoma breast. Describe the various surgical interventions. Describe the immediate post operative assessments to be made and plan the nursing interventions on priority basis (3+5+7=15)
14. Mrs. Thomas 70 years is admitted in the ward with 60% burns. Explain the pathophysiology in burns. Describe the role of nurse in fluid management in the acute phase. (4+6=10)
15. Mrs. Saroja aged 50 yrs mother of 2 children came with a lump in her breast. Define Breast cancer. List down the diagnostic tests to confirm the diagnosis. Explain specific postoperative nursing management of this patient. (3+4+8=15)

Asterisks (*) denotes repetition.

16. Mrs. X, 55 years old is admitted with breast cancer and posted for radical mastectomy. Enumerate the risk factors and diagnostic measures of breast cancer. Explain the post operative management of a patient after mastectomy (12)

Short essays:

1. Mrs. X is admitted with history of alleged burns. Classify burns according to the cause of injury. What are the complications of burns in the acute phase. Which are the formulae used to calculate fluid replacement in burn injury. (2+2+3)
2. 2. Enumerate the risk factors for breast cancer. Discuss the surgical management of breast cancer* (2+5=7)
3. List down Indications of Thyroidectomy. Write down the Complications of Thyroidectomy. Explain Immediate post operative management after Thyroidectomy (2+2+3=7)
4. Mr Y, a 50 years old man is admitted to the emergency department with 70% TBSA burns. Explain the initial assessment and fluid resuscitation plan of Mr Y. (7)

Short notes:

1. Types of head injury (5)
2. Glasgow coma scale (GCS) interpretation (5)
3. Increased intra cranial pressure (5)
4. Complications of chemotherapy (5)
5. Post mastectomy exercises***** (5)
6. Complications of radiotherapy (5)
7. Post mastectomy exercises*[8] (5)
8. Fluid therapy in burns*** (5)
9. Complications of thyroidectomy*[8] (5)

Asterisks (*) denotes repetition.

List down:

1. Ways of spread of malignant growths (3)
2. Three major complications of burns.**** (3)
3. Complications of head injury (3)
4. Five types of head injuries (3)
5. Signs of increased intracranial pressure ** (3)
6. Clinical features of rheumatoid arthritis (3)
7. Warning signs of cancer******* (3)
8. Complications of thyroidectomy (3)

Differentiate between:

1. Benign tumor and malignant tumor**** (2)
2. Concussion and contusion(2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-8

NURSING MANAGEMENT OF PATIENTS WITH DISORDERS OF EAR, NOSE AND THROAT

Essays:

1. Discuss the etiology, clinical manifestations, surgical and nursing management of chronic otitis media. (1+2+2+5=10)

Short notes:

1. Nursing management for epistaxis (5)
2. Epistaxis** (5)
3. Nursing care following tonsillectomy (5)
4. Tracheostomy care * (5)
5. Role of nurse in taking care of patients after tonsillectomy (5)
6. First aid measures for epistaxis (5)

List down:

1. Three surgeries for chronic otitis media* (3)
2. Signs and symptoms of otitis media (3)
3. List the causes of epistaxis (4)
4. Types of hearing aids**** (3)
5. Types of hearing loss* (4)
6. Indications for tracheostomy***** (3)

Asterisks (*) denotes repetition.

Differentiate between:

1. Laryngectomy and tonsillectomy (2)
2. Mastectomy and mastoidectomy (2)
3. Pharyngitis and tonsillitis (2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-9

NURSING MANAGEMENT OF PATIENTS WITH DISORDERS OF THE EYE

Essays:

1. Define cataract and enumerate its aetiology. Explain the surgical therapy and nursing management of a patient after cataract surgery. (1+ 2+2+5=10)

Short notes:

1. Retinal detachment*** (5)
2. Care of patient after cataract surgery (5)
3. Keratitis (5)
4. Enucleation (5)
5. Health education of patients with glaucoma (5)
6. Eye banking**** (5)
7. Ocular emergencies (5)

List down:

1. Three characteristics of glaucoma (3)
2. Types of cataract (3)
3. Three ocular injuries (3)
4. Four types of refractive errors (3)
5. Refraction errors (3)
6. Types of glaucoma* (3)

Asterisks (*) denotes repetition.

Differentiate between:

1. Stye and chalazion****(2)
2. Intracranial pressure and intra ocular pressure(2)
3. Myopia and hypermetropia*****(2)
4. Dacryocystitis and cholecystitis(4)
5. Keratoplasty and myringoplasty(2)
6. Keratitis and uveitis(2)
7. Conjunctivitis and dacryocystitis***(2)

TCON ACADEMIC CLUB

UNIT 1

INTRODUCTION

Short notes:

1. Intravenous routes .(5)
2. Parenteral route of drug administration (5)

Difference between:

1. Oral and parenteral routes of drug administration(3)****
2. Intramuscular and intravenous route(3)***
3. Oral and I/V route of administration(4)**(3)
4. Chemical name and generic name(3)
5. Pharmacodynamics and pharmacokinetics(3)**
6. Oral and sublingual routes(3)*
7. Intravenous and subcutaneous routes(3)

List down the following:

1. Routes of drug administration and its advantages (4)

Asterisks (*) denotes repetition.

UNIT 2

CHEMOTHERAPY

Essay

1. Classify penicillins. Explain the mechanism of action, adverse effects and uses of penicillin G. Add a note on chemoprophylaxis. (4+8+5=17)

2. Name four glucocorticoid preparations. Mention the adverse effects and uses of glucocorticoids (2+3+3)

3. Name four glucocorticoid preparations. Write the uses and adverse effects of glucocorticoids. Discuss the nursing implications. (2+8+2)

4. Name four first line anti tubercular drugs and list two adverse effects of any one of them. What advice will you give to a patient regarding the use of anti-tubercular drugs. (2+1+5=8)

5. Classify the β lactam antibiotics with one example each. Explain the mechanism of action, therapeutic uses and adverse effects of penicillin. What precaution do you take while administering penicillin to your patient (4+2+4+4+3)

6. Name four drugs used in malaria and two drugs used in chloroqine resistant malaria. What advice is given to people, going to a place where malaria is prevalent (4+2+2=8)

7. Classify anti tubercular drugs. Discuss the mechanism of action, adverse effects and uses of rifampin/rifampicin. What advice you will give to a patient, regarding the use of anti tubercular drugs. (4+8+5=17)

Asterisks (*) denotes repetition.

8. Name four penicillins and four cephalosporins. Describe the precautions to be taken while using antibiotics and what advice will you give to the patient. (4+2+2)

9. Name four tetracyclines and four aminoglycosides. List the precautions to be taken while using antibiotics and what advice will you give to the patient. (4+2+2)

10. Enumerate fluoroquinolones. Explain the mechanism of action, uses and adverse effects of ciprofloxacin. (2+2+2+2)

11. Classify penicillins. Describe the nurse's responsibility while administering penicillins. (3+4)

12. Name four fluoroquinolones. Write the uses and adverse effects of any one of them (3+2+2)

13. Name four penicillin preparations and discuss its use & adverse drug reactions. Add a note on the anaphylactic shock. *(6+2=8)

Short note

1. Clotrimazole *(5)
2. 1st line anti tb drugs ****(5)
3. Pencillin g(5)
4. Antiviral drugs(5)
5. Amoxicillin(5)
6. Chloroquine(5)
7. Rifampacin *(5)
8. Metronidazole *(5)
9. Ciprofloxacin(5)
10. Artemisinin(5)
11. Anti leprotic drugs(5)
12. Antimalarial drugs (5)

Asterisks (*) denotes repetition.

Difference between:

1. Amoxicillin and ampicilin(3)
2. Pencilin and tetracycline(3)
3. Tetracycline and doxycillin (4)

List down:

1. First line anti TB drug (4)
2. Advantages of multi drug regimen(4)

Answer briefly

1. Metronidazole is used in amoebiasis(4)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 3

ANTISEPTIC AND DISINFECTANT

Difference between:

1. Antiseptic and disinfectant(3)*
2. Bactericidal and bacteriostatic drugs (3)

UNIT4

GASTRO INTESTINE

Short essay:

1. Classify the drugs used as Anti Emetics with one example each and explain the mechanism of action, uses and adverse effects of Metoclopramide(2+5)

Short note:

2. Ranitidine (5)*
3. Proton pump inhibitors (5)
4. Antacids(5)
5. Antiemitics(5)*
6. Pantoprazol(5)

Difference between :

1. Emetics and anti emetics(3)

Asterisks (*) denotes repetition.

UNIT 5

RESPIRATORY SYSTEM

Essay

1. Name four drugs belonging to different groups used for the treatment of bronchial asthma. Mention two specific adverse effects of inhalational gluco-corticoids. What advice will you give to a patient regarding the drug treatment of bronchial asthma. (2+3+5=10)

2. Classify drug used for bronchial asthma with 2 example ach add a note on inhalational corticosteroid(4+3)

Short note

1. Bronchodialators (5)**
2. Antitussives (5)

Difference between:

1. Expectorant and anti tussive (3)*

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 6

URINARY SYSTEM

Essay

1. Classify diuretics with suitable examples. Write the mechanism of action, uses, adverse effects and contraindications of frusemide. (4+2+2+2+2)

Short notes

5. frusemide(5)
6. Uses and adverse effects of furosemide(5)
7. Diuretics (5)

Difference between:

1. Thiazide and frusemide* (4)
2. Hydrochlorothiazide and furosemide(3)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 7

MISCELLANEOUS

Short notes:

1. Management of organophosphate poisoning(5)*
2. Vit A(5)
3. Immunosuppressant (5)

Difference between:

1. immunosuppressant and immunostimulant(4)

TCON ACADEMIC CLUB

UNIT 8

SKIN & MUCOUS MEMBRANE

Asterisks (*) denotes repetition.

UNIT 9

NERVOUS SYSTEM

Essay

1. Classify non steroidal anti-inflammatory drugs (NSAIDs). Explain the mechanism of action, adverse effects and uses of aspirin.What instructions will you give to a patient regarding the use of pain killers. (2+4+2=8)

2. Classify non-steroidal anti-inflammatory drugs (NSAIDs). Describe the mechanism of action, adverse effects and uses of paracetamol. What advise you will give, regarding the use of NSAIDS in peptic ulcer patients. (4+8+5=17)

3. Classify NSAIDs. Write the mechanism of action, uses and adverse effects of aspirin. Add a note on the treatment of paracetamol poisoning(4+9+4)*

4. Classify non-steroidal anti-inflammatory drugs. Explain the mechanism of action, adverse effects and uses of aspirin. Add a note on the treatment of salicylate over dosage. (4+9+4)

5. Classify sedative hypnotics. Write the uses and adverse effects of diazepam.(3+2+2)

6. Classify non-steroidal anti-inflammatory drugs. Write the uses and adverse effects of aspirin. Describe the nurse's responsibility in administering aspirin to a patient (2+8+2)

7. Classify non steroidal anti-inflammatory drugs (NSAIDs). Explain the mechanism of action, adverse effects and uses of aspirin. What instructions will you give to a patient regarding the use of pain killers (4+8+5=17)

Asterisks (*) denotes repetition.

Short essay

1. Classify non-steroidal anti-inflammatory drugs (nsaid). Explain the mechanism of action. What are the uses and adverse effects of aspirin. (7)
2. Classify drugs used in anesthesia. Briefly explain general anesthesia (GA).(7)

Short note

5. chloropromazine(5)*
6. mood stabilizer(5)
7. cetrizine(5)
8. morphin(5)*
9. anticholinergic drug (5)
10. diazepam (5)***
11. local anasthetic (5)
12. anti histamine (5)
13. dopamine(5)
14. aspirin (5)
15. phenytoin sodium (5)*
16. aracetamol(5)*
17. anti epileptic(5) *
18. antipsychotic(5)
19. adrenaline
20. Uses of prednisolone(5)
21. Uses of atropine and its derivatives(5)*
22. Prednisolone(5)**
23. Digoxin(5)*
24. ACE inhibitors (5)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

Differentiate between:

1. Lignocaine and halothane (3)
2. Aspirin and morphine(4)
3. Physostigmine and neostigmine*(3)
4. Acetylcholine and adrenaline(3)
5. Cholinergics and anticholinergics(3)
6. Opiods and non-opiods(3)
7. Local anaesthetics and general anesthetics(3)
8. Anti anxiety and anti depressants(3)
9. Hypnotics and sedatives (3)
10. Prednisolon and hydrocortisone (3)

List down

1. Adrenergic drugs and their uses(4)
2. Inhalational general anaesthetics and advantages of halothane(4)
3. Uses and contraindications of morphine(4)
4. Antipsychotic drugs(4)

Answer briefly

1. Diazepam is used in status epilepticus. Give reason(4)
2. Uses of morphine and why morphine is contraindicated in a patient with head injury(4)
3. Morphine sulfate is administered to a patient on acute MI. State possible reasons (4)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 10

CARDIO VASCULAR SYSTEM

Essay

1. Classify antihypertensive drugs with suitable examples. Write the mechanism of action, uses, adverse effects and contraindications of angiotensin converting enzyme inhibitors (4+2+2+2+2)

2. Classify antianginal drugs with two examples each. Explain the mechanism of action, uses and adverse effects of nitrates. (5+4+4+4)

3. Classify anti anginal drugs. Explain the mechanism of action, uses and adverse effects of nitrates. What instructions will you give regarding the use of anti anginal drugs for a coronary artery disease patient. (4+8+5=17)

4. Classify the drugs used in congestive cardiac failure. Describe the mechanism of action, adverse effects and uses of any one. Outline the management of acute left ventricular failure.(5+4+3+3+2)

5. Classify anti hypertensives. Explain the mechanism of action, adverse effects and uses of ACE inhibitors (angiotensin converting enzyme inhibitors). What instructions will you give to a patient, regarding the drug treatment of hypertension. (4+8+5=17)

6. Classify anti hypertensives. Discuss in detail angiotensin converting enzyme inhibitors. Add a note on drugs used in hypertensive emergencies. (4+8+5=17)

7. Classify anticoagulants with suitable examples. Write the mechanism of action,uses and adverse effects of heparin sodium. (2+5)

Asterisks (*) denotes repetition.

8. Classify Beta blockers with suitable examples and write the uses and contra indications of propranolol. (3+4)

Short note

1. prednisolone (5)
2. digoxin (5)
3. uses and adverse effect of atropin and its substitutes(5)
4. nitroglycerine (5)
5. warfarin sodium (5)
6. hematinics (5)
7. cholesterole lowering drugs (5)
8. anti anginal drugs (5)
9. anticoagulant (5)
10. antiplatelets(5)
11. Uses of _beta blockers(5)

Differentiate between:

1. Heparin and warfarin (4)&(3)*
2. Coagulants and anticoagulants(3)**
3. Verapamil and nifedipine(3)
4. Enalapril and losartan(3)
5. Propranolol and metoprolol(4)

LIST DOWN

1. Four antihypertensives belonging to different groups(4)*

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT 11

DRUGS USED FOR HORMONAL DISORDER CONTRACEPTIVES

Essay:

1. Classify oral hypoglycaemic drugs with two examples each. Explain the mechanism of action and adverse effects of sulfonylurea group of drugs. (4+2+2)
2. Classify oral hypoglycaemic drugs. Explain the mechanism of action and adverse effects of sulfonylureas. What instructions will you give to a patient regarding the drug treatment of diabetes mellitus. (4+6+5=15)

3. Name four oral hypoglycaemic drugs and two insulin preparations. What advise will you give to a patient, regarding the treatment of diabetes mellitus. (4+2+2=8)

4. List four hormonal contraceptives. Write their adverse effects. What advice will you give to the lady on oral contraceptive pill. (2+4+2)

5. Classify oral antidiabetics. Mention the mechanism of action and 2 adverse effects of any one of them. Write the nursing implications (3 + 2+2)

Short note :

1. oral contraceptives(5)*****
2. insulin(5)*
3. name 4 anti-diabetics what advice will you give to the patient with diabetic mellitus(5)
4. hormonal contraceptives(5)*

Asterisks (*) denotes repetition.

5. oral Anti diabetics
6. thyroid suppliment (5)
7. adrenaline (5)
8. anabolic steroids (5)
9. Uses of glucocorticoids(5)*

difference between:

1. Testosterone and anabolic steroids(3)
2. Oestrogen and progesterone(3)***
3. Metformin and glibenclamide(3)
4. Insulin and glibenclamide(3)
5. Acetylcholine and adrenaline(3)
6. Adrenaline and noradrenaline(3)
7. Glibenclamide and Metformin(4)
8. Uterine stimulants and relaxants(3)*

List down:

1. Adrenergic drugs and their uses(4)
2. Oral hypoglycemic agents (4)

Answer briefly:

1. Adrenaline is used in anaphylaxis – Give reason(4)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

CALCULATIONS

1. Calculate the quantity of glucose needed to prepare 750ml of 25% glucose solution(5)
2. Find the quantity of sodium chloride required for preparing 200ml of a 0.9% solution.(5)
3. What quantity of sodium chloride is required to prepare 500 ml of a 5% solution(5)
4. Prepare 200 ml of a solution of ammonia containing 4% by weight of ammonia. The strong solution of ammonia contains 32% of ammonia w/w(5)

5. Calculate the flow rate if 1 Litre of 5 % dextrose is to be given intravenously (IV)over a period of four hours(4)

6. Physician orders nitroglycerin 50mg in 250 ml 5% dextrose, run at 20micrograms/minute. How many ml/hour, should the infusion pump be set to deliver 20micrograms/minute.(5)

7. A solution contains 40,000 units of penicillin in 1 ml. How much of the solution should be drawn to give a dose of 2 lakh units(5)

8. A patient is prescribed 24 units of insulin. The Insulin vial U-40 is supplied. Calculate the volume of insulin (in ml) required for this patient(4)

9. Physician orders, 500 ml of 5% dextrose to be infused by intra venous route over a period of 12 hours. The drop factor is 15. Calculate the number of drops per minute to be infused(5)

10. Calculate the quantity of salt to be added to 2 litres of water to make a solution of normal saline(4)

Asterisks (*) denotes repetition.

11. Find the amount of water to be added to 200 ml of a 1 in 50 solution to make it 1% solution(5)

12. Thiopentone sodium 2.5% needs to be given to a woman weighing 50 kg. Dose to be given is 5mg/kg body weight. What is the required volume of drug for injection.(5)

13. Dopamine is prescribed for a patient weighing 60 kg at a dose of 3 microgram/kg/minute. You have a solution of 500 ml 5% dextrose with 200mg dopamine. Calculate the rate of flow of the solution in one minute.(5)

14. How many days will a 150 ml bottle of cefaclor oral suspension (125mg/5ml) last if the patient has to take 250mg tds(5)

15. How much of insulin would you take if 24 units of insulin is required. Insulin vial U-40 is supplied. (Insulin syringe has 10 divisions in 1 ml.)(5)

16. Calculate the rate of flow if one litre of 0.9% sodium chloride is to be given intravenously over 6 hours(5)

17. INJ.regular insulin 20 units s/c od is prescribed for your patient.you are supplied with a vial of regular insulin 40 units/ml.Howmuch amount of insulin would you take in an insulin syringe with 100 divisions/ml(5)

18. What quantity of sodium chloride is required to prepare 500 ml of a 5% solution(5)

.

Asterisks (*) denotes repetition.

COMMUNITY NURSING

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-1

INTRODUCTION

Essays:

1. Define health. Explain the determinants of health (2+8=10)
2. Define community health nursing. List the changing concepts of health. Describe the various dimensions of health. (2+3+5)

Short essay:

1. List any six dimensions of health. Explain any one (3+4)

Short notes:

1. Methods of waste disposal .(5)
2. Levels of disease prevention (5)
3. National immunization schedule(5)
4. Dimensions of health (5)
5. Determinants of health (5)
6. Health promotion measures (5)
7. Promotion of mental health(5)
8. Cold chain equipement(5)
9. Cold chain system in immunization(5)
10. Under five immunization(5)
11. Pulse polio immunization programme (5)
12. Protective immunization up to five years (5)

Asterisks (*) denotes repetition.

Difference between :

1. Mental health and mental illness (2)
2. Bio-medical concept - Ecological concept* (2)
3. Active immunity - Passive immunity(2)
4. Levels of care - Levels of prevention(2)
5. Primary prevention - Secondary prevention (2)
6. Primary prevention - Primordial prevention(2&4)
7. Primordial and primary prevention(4)
8. Active immunity and herd immunity(4)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-2

ENVIRONMENTAL HEALTH

Essays:

1. Mention the main sources of air pollution. List the adverse health effects of major air pollutants. Briefly describe the methods for the prevention and control of air pollution.(2+3+5)
2. List the sources of water. Explain the steps in large scale water purification. (3+7=10)
3. Define safe and wholesome water. Explain the purification of water on a small scale.
   (2+8=10)
4. Define sewage. Explain the modern sewage treatment (2+8=10)
5. Define safe and wholesome water. Describe the prevention and management of water pollution (3+7)
6. List the mosquito borne diseases in India. Explain the various methods of mosquito control.(2+8)
7. Define environmental sanitation. List the components of environment. Describe the methods of solid waste disposal. (2+3+7)

Short notes:

1. Housing standards(5)
2. Food poisoning (5)
3. Mosquito control measures(5)
4. Methods of refuse disposal(5)
5. Methods of disposal of human excreta (5)
6. Air pollution (5)
7. Sanitary well(5)
8. Standards of ventilation(5)
9. Methods of food preservation(5)
10. Fly control measures (5)
11. Importance of food hygiene (5)

Asterisks (*) denotes repetition.

12. Effects of noise pollution (5)
13. Milk hygiene (5)
14. Method of household purification of water(5)
15. Purification water on small scale (5)
16. Effect of global warming on health (5)

Difference between:

1. Slow sand filtration - Rapid sand filtration(2)
2. Vehicle-borne transmission - Vector-borne transmission(2)
3. Mechanical transmission - Biological transmission(2)
4. Sewage and sullage(4)
5. Sewage – sullage(2)
6. Shallow well - Deep well(2)
7. Source – Reservoir(2)
8. Amoebiasis – Ascarias(2)
9. Anopheles mosquito - Culex mosquito(2)
10. Dumping – composting(2)
11. Arthropod borne diseases – rodent borne diseases(2)
12. Afforestation – deforestation(2)
13. Food poisoning and food adulteration (4)

List down

1. Control measures of noise pollution(4)
2. Eight methods of preparation of food(4)
3. Eight methods of food preservation(4)

Give reason

1. Water pollution is more common in urban areas(4)
2. Ground water is superior to surface water(4)
3. Global warming (4)

Asterisks (*) denotes repetition.

UNIT-3

PRIMARY HEALTH CENTRE

Essay:

1. Define primary health care. Explain the principles and elements of primary health care (2+8=10)

Short essay:

1. Define primary health care. What are the elements of primary health care (2+5)**

Short note (5)

1. Elements of PHC***(5)
2. Functions of PHC *(5)
3. Principles of primary health care(5)
4. Primary health care (5)

List down:

1. Millennium development goals (4)

Asterisks (*) denotes repetition.

UNIT-4

EPIDEMIOLOGY

Long essay:

1. Define epidemiological triad. List common nutritional problems in India. Explain the epidemiology of obesity. (2+3+7)
2. Define epidemiology. Enlist the measurements in epidemiology. Describe the methods of epidemiology. (12)

Short essays:

1. Define epidemiology. List the aims of epidemiology. Describe the steps of descriptive epidemiology. (2+3+5)
2. Define epidemiology. Explain descriptive epidemiology. (2+8=10)

Short notes

1. Case control study(5)
2. Epidemiological triad ***(5)
3. Investigation of an epidemic(5)
4. Descriptive epidemiology (5)
5. Measures of morbidity(5)
6. Dynamics of disease transmission(5)
7. Mortality measurement (5)

Difference between:

1. Descriptive epidemiology - Analytical epidemiology(2)
2. Mortality and morbidity(4)**

Asterisks (*) denotes repetition.

3. Incidence – Prevalence(2)
4. Rate and ratio(2)
5. Lecture method - Demonstration method(2)
6. Pandemic – Sporadic(2)
7. Epidemic – Pandemic(2)*(4)
8. Quarantine – Isolation(2)
9. Disability and impairment(2)
10. Case control study and cohort study(4)
11. Contagious disease - Communicable disease(2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-5

COMMUNICABLE DISEASES

Essays:

1. List the intestinal infections. Describe the epidemiology of poliomyelitis (2+8=10)
2. Define epidemiology. Explain the epidemiology of tuberculosis. (2+8=10)
3. List the methods of epidemiology. Explain the epidemiology of rabies. (2+8=10)
4. List the aims of epidemiology. Explain the epidemiology of malaria (2+8=10)
5. Define epidemiological triad. Describe the dynamics of disease transmission of tuberculosis. Explain the role of community health nurse in prevention and control of tuberculosis. (2+3+5)
6. List the mosquito borne diseases in India. Explain the various methods of mosquito control. (2+8)

Short essay:

1. List any six intestinal infections. Explain the prevention of worm infestation. (3+4)
2. List any six respiratory infections. Describe the epidemiology of measles. (3+4)

Short notes (5)

1. Universal precautions in prevention of AIDS(5)
2. DOTS therapy (5)
3. Prevention and control of AIDS(5)
4. Pulse polio immunization programme(5)
5. Mumps(5)
6. Swine flu/epidemiology of swine flue(5)
7. Causes and prevention of diarrheal disease(5)

Asterisks (*) denotes repetition.

8. Influenza(5)
9. Epidemiology of malaria (5)
10. ORS (5)
11. Modes of transmission of HIV (5)
12. Causes and prevention of acute respiratory infection(5)
13. Home care management of tuberculosis(5)
14. Home care management of chicken pox(5)

Difference between:

1. .Measles_Mumps(2)
2. Mantoux test - Schick test(2)
3. Salk vaccine - Sabin vaccine(2)
4. Incubation period - Convalescent period(2)
5. Vaccination – Chemoprophylaxis(2)
6. Cholera – Diarrhoea(2)
7. Case – Carrier(2)
8. Hepatitis A - Hepatitis B(2)
9. Definitive host - Intermediate host(2)
10. Infection – Infestation(2)
11. Leptospirosis – Leishmaniasis(2)
12. Incubatory carrier - Convalescent carrier(2)
13. Killed vaccine - Live vaccine(2)
14. Round worm - Tape worm(2)
15. Small pox - Chicken pox(2)
16. Brucellosis and salmonellosis(4)
17. Cross infection - Nosocomial infection(2)

List down:

1. 8 zoonotic disease(4)
2. 8 STDs(4)
3. 4 major and minor signs of AIDS(4)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-6

NON COMMUNICABLE DISEASE

Essays:

1. Define malnutrition and list the nutritional problems in India. Explain in detail about protein energy malnutrition (2+3+5=10)

2. Explain the types of accidents and discuss the factors responsible for accidents. Describe the role of community health nurse in prevention of accidents. (5+5)

Short note: (5)

1. Prevention ofCAD(5)
2. Flurosis(5)
3. Control of blindness(5)
4. Prevention of cancer(5)
5. Prevention of accident(5)
6. Causes and prevention of blindness(5)
7. PEM(5)
8. Signs and symptoms and prevention of iron deficiency anaemia(5)
9. Vit A deficiency(5)
10. Causes and prevention of road traffic accidents(5)
11. Secondary prevention in the management of diabetes mellitus(5)
12. Prevention and management of iodine deficiency disorders(5)

Asterisks (*) denotes repetition.

Differentiate between:

1. Under nutrition and over nutrition(2)*

List down:

1. Increased rate of accidents in India(4)

Give reason:

1. Oral cancer is amenable to primary prevention(4)
2. Increased rate of accidents in India(4)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-7

DEMOGRAPHY

Essays:

1. Define demography. Explain the impact of population explosion. (2+8)

Short essay:

1. Define demography. Explain briefly the demographic trends in India (2+5)
2. Define demography. Describe demographic cycle (2+5)

Short notes :

1. Demographic cycle**(5)
2. Demographic transition(5)

Differencebetween :

1. immigration- Emigration(2)
2. target approach-target free approach(2)
3. Rates – Ratios(4)****

Give reason:

1. Low sex ratio in India (4)

List down

1. Demographic and reproductive indicators

Asterisks (*) denotes repetition.

UNIT-8

POPULATION CONTROL

Essay :

1. Enlist the methods of contraception. Explain the permanent methods of family planning. (4+6)
2. Enlist the advantage of spacing childbirths. Explain the natural methods of family planning.(3+7)
3. Define family and mention the objectives of family health care. Justify- 'family as a unit of service' (2+3+5=10)
4. Define family planning. Explain the spacing methods of contraception (2+8=10)
5. Define nursing process. List the objectives of family health care. Explain family development cycle. (2+3+5)
6. Define population explosion. Classify contraceptive methods. Add a note on permanent methods. (2+3+7)

Short note:

1. Intrauterine devices: merits and demerits(5)
2. After care of vasectomy(5)
3. Family development cycle**(5)
4. Family as a unit of health service(5)
5. IUD (intra uterine devices) (5)
6. Family counseling(5)
7. Population explosion*(5)
8. Calendar method of contraception(5)
9. Medical termination of pregnancy(5)
10. Family nursing process(5)
11. MTP act(5)

Asterisks (*) denotes repetition.

Difference between:

1. Joint family - Nuclear family(2)
2. Abstinence - Coitus interruptus(2)
3. Vasectomy - Tubectomy(2)

List down:

1. Temporary methods of contraception(4)

Give reason:

1. Emergency contraception(4)
2. High fertility in India(4)
3. Emergency contraception is a post coital contraception(4)
4. Population explosion (4)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.

UNIT-9

INFORMATION EDUCATION COMMUNICATION

Essays:

1. Define health education. Explain the methods and media of Information education and communication (2+8=10)
2. Define health education. Explain the principles of health education. (3+7)
3. Define health education. Enlist the aims and objectives of health education. Explain the principles of health education (2+3+7)
4. Define health education. Describe the role of a nurse in information, education and communication. (3+7)

Short essay:

1. List any six principles of health education. Explain two with example. (3+4)
2. Define health education. Briefly explain the methods and media of IEC (2+5)

Short note:

1. Communication process (5)
2. Role of nurse in information, education and communication (5)*
3. Principles of health education (5)***
4. Audio-visual aids (5)
5. Approaches to health education(5)
6. Role of nurse in IEC(5)
7. Methods of information, education and communication

Asterisks (*) denotes repetition.

Difference between:

1. Health education – propaganda(2)
2. Charts – Posters(2)
3. Lecture method - Demonstration method(2)
4. Charts – Models(2)

TCON ACADEMIC CLUB

Asterisks (*) denotes repetition.
